

Research and Development Cell

Education has been playing a very crucial role in bringing about transformation in the social, cultural and scientific advances which are linked with human progress for which research has always been one of the contributing factor. Research in Education has been perceived in diverse ways which demands a complex mix of capabilities and resources. Education being an applied discipline has highly challenging task of providing practical solutions to the problems faced in the field. Marathwada college of Education, Aurangabad has been the Research Centre from 1984 and the first PhD awardee of the University was from this research centre. Continuing with the Research work the college converted its research centre into Research and Development Cell(RDC) as per the communication No.1-5/2021(NEP/DESK-PARL) dated 14th March 2022 of UGC for development in the research field and its social utility. The RDC of the college facilitates and encourages the research culture among faculty and students.

The RDC will organize various orientation programmes, seminars, workshops, conferences, webinars, etc. on various aspects of interdisciplinary research to offer opportunities not only to the faculty from this institution but also from other institutions. The RDC will motivate teachers to take up research in education.
